1. PURPOSE

1.1 INTRODUCTION

In its 2002 report the Improving the Effectiveness of the Youth Justice System Working Group established a set of national standards for Scotland's youth justice services. The delivery challenge for each multi-disciplinary youth justice team in every Local Authority is to implement these standards and to achieve the national target of reducing the number of Persistent Offenders by 10% by 2006. In June 2006, Justice Minister Cathy Jamieson announced at the annual Youth Justice Conference that the target for 2008 would stand at a further 10% reduction.

To assist Local Authorities in achieving this target and implement the full range of national standards, a baseline report was produced and published in August 04. It set out performance in the financial year 2003/04 against a number of key indicators. In consultation with Ministers, the Scottish Executive, COSLA and ACPOS, the Scottish Children's Reporters Administration (SCRA) committed to produce and publish a series of Quarterly Performance Monitoring Reports to enable monitoring of these indicators, namely:

Overall

1. The total number of young people referred to SCRA on offence grounds during the period.
2. The total number of offence-based referrals received by SCRA during the period being reported.

Persistent Offenders

3. The number of young people who triggered the national Persistent Offender definition during the period being reported.
4. The number of offence based referrals received by SCRA for children who triggered the national Persistent Offender definition during the period being reported.

Timeliness

5. Key Time Interval Standards, showing speed of working across key agencies:
 - i. Time Interval Standard 1 – Speed of Submission of police reports to SCRA
 - ii. Time Interval Standard 3 – Timely submission of social work reports to SCRA
 - iii. Time Interval Standard 4 – Speed of Reporter decision making
6. Average overall time taken between the receipt of an offence-based referral by SCRA and a decision being reached by a Children's Hearing.

The data produced for this report has been displayed alongside the comparative quarter for the previous year and will build throughout the year to show all quarters for the current year and the comparator for the quarter in the reporting period of previous year.
